

OCCUPY 2.0: FROM OUTRAGE TO ARCHITECTURE

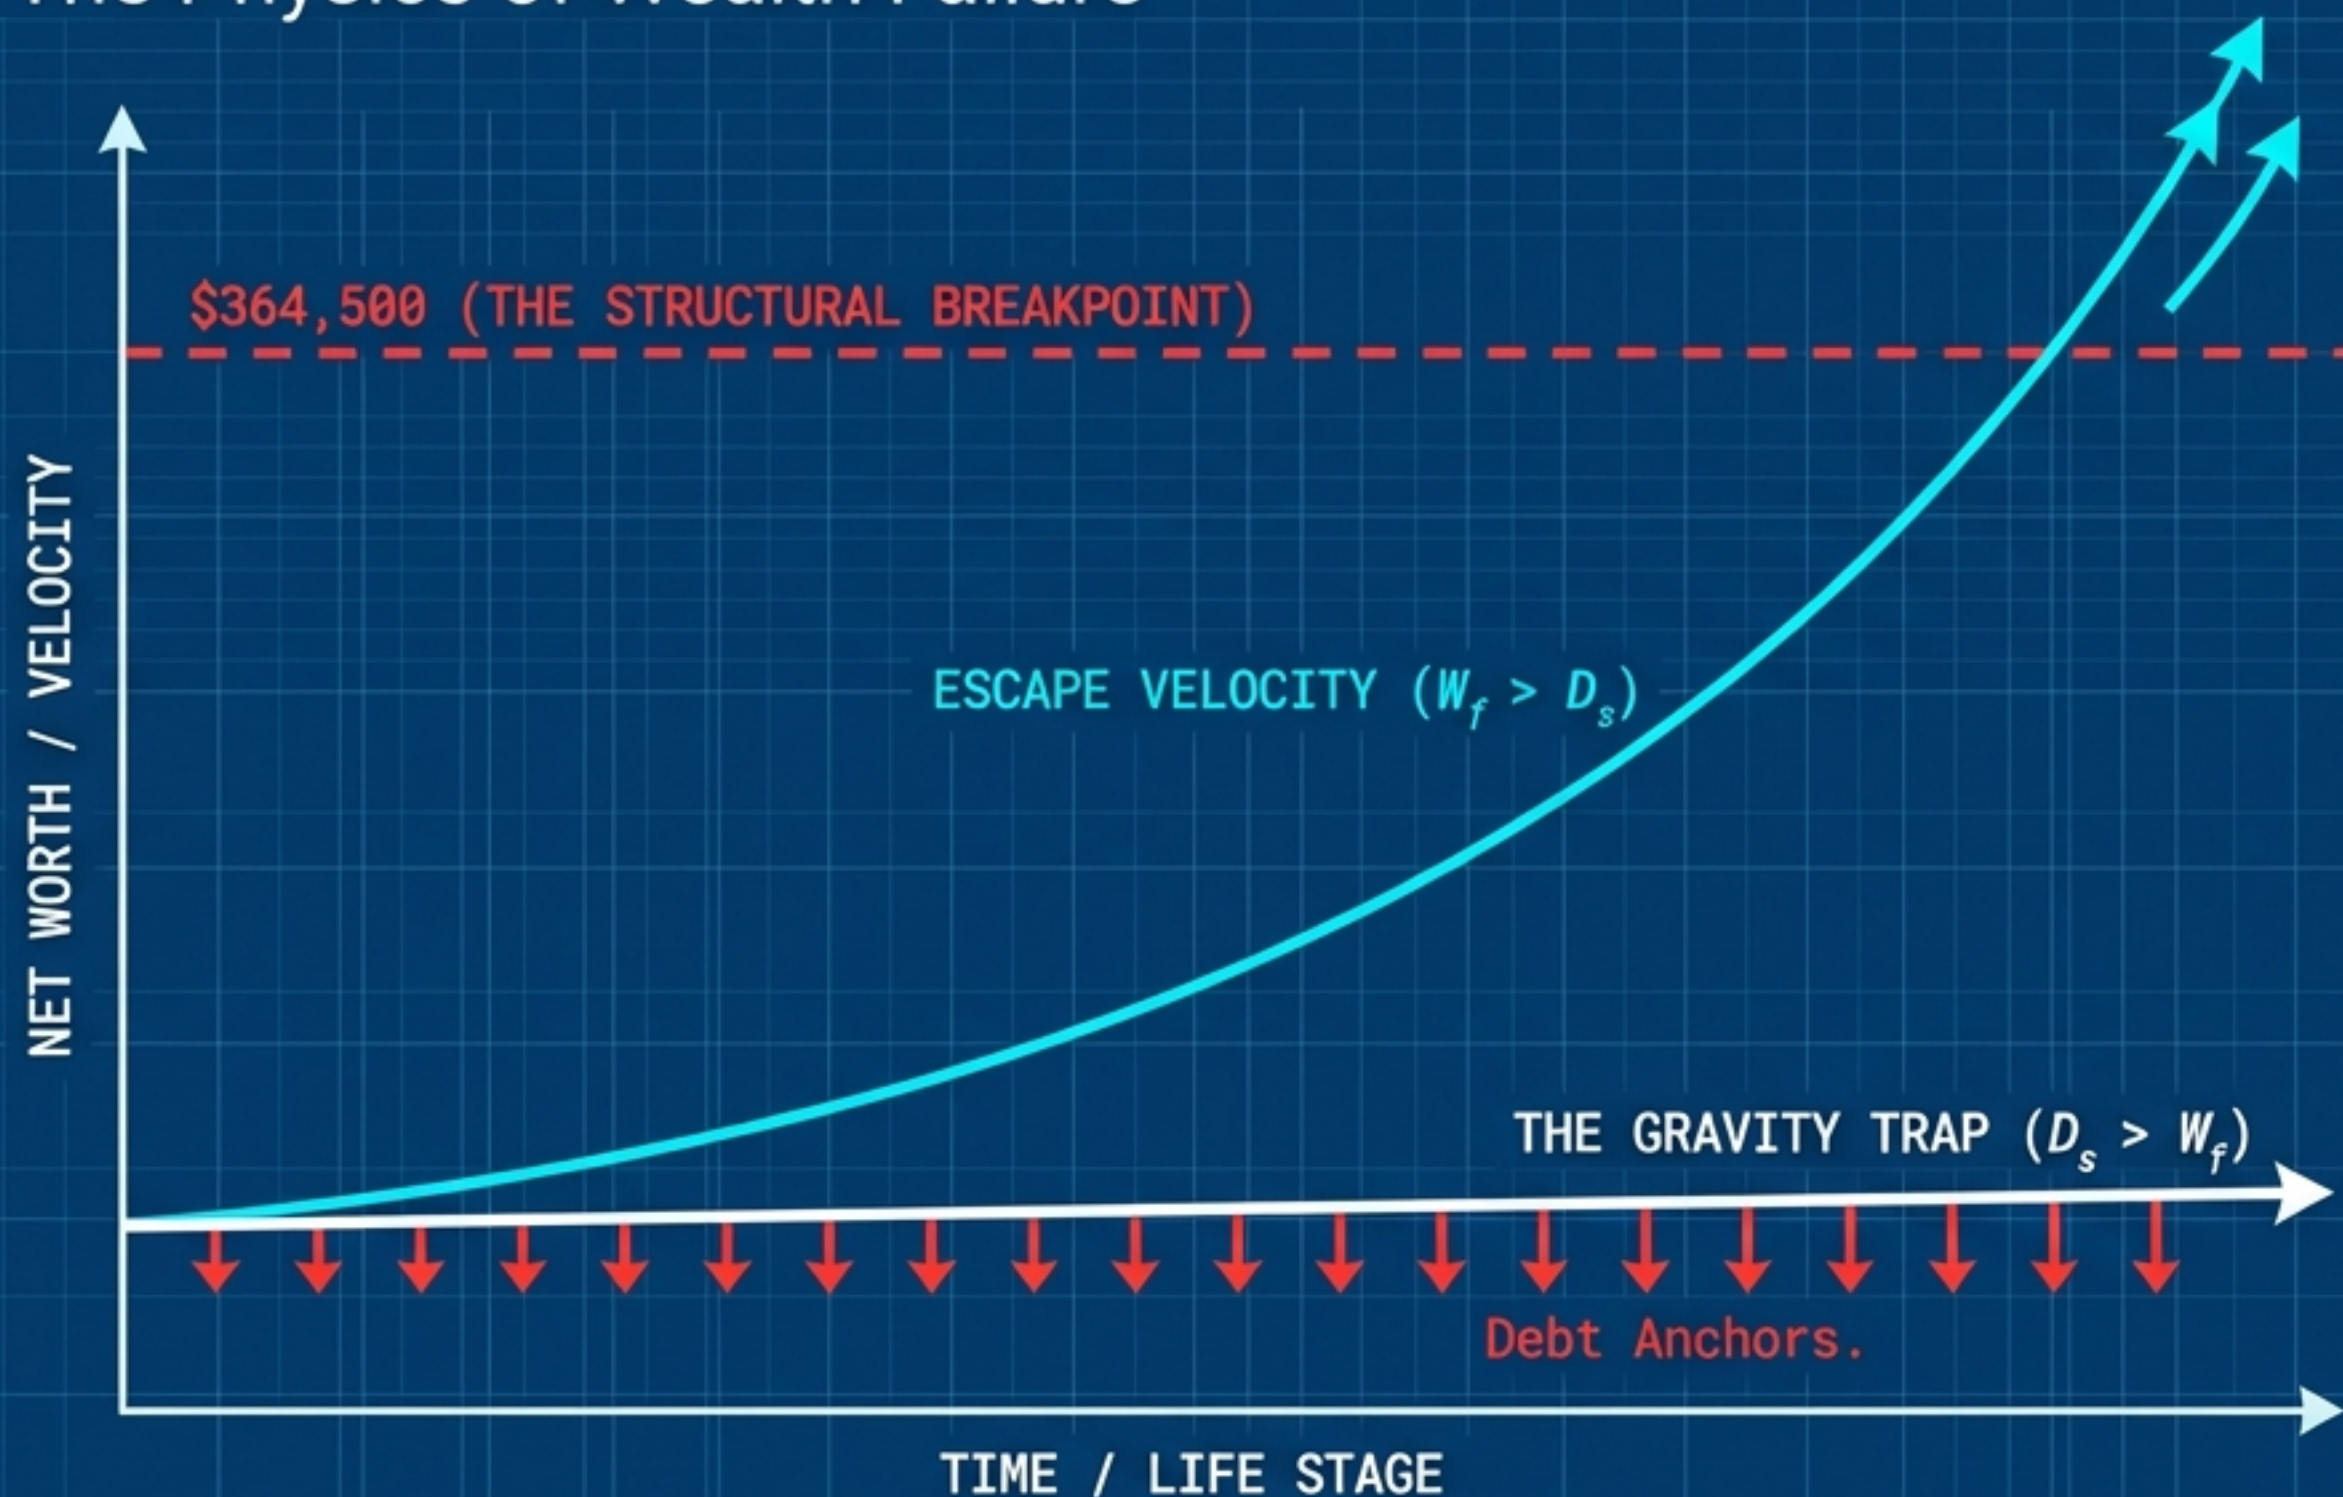

Building the Integrated Capability System to Restore the American Dream.

PROJECT: The Social Mobility Revolution
FRAMEWORK: Race-Class-Mobility (R-C-M)
OBJECTIVE: Transition from Consumption State
to Capability State
STATUS: Urgent / Structural Failure Detected

THE DIAGNOSIS: GRAVITY VS. ESCAPE VELOCITY

The Physics of Wealth Failure

1. THE GRAVITY TRAP (Bottom 80%): Households are grounded. The drag of debt (D_s) and cost of living exceeds the lift of wages (W_f). You burn fuel just to hover.

2. ESCAPE VELOCITY (Top 20%): Households cross the Red Line. Above this breakpoint, capital returns (r) outpace growth (g). Wealth compounds automatically.

SYSTEM FAILURE: The bottom 80% aren't failing to climb; they are piloting vehicles with engines too small to break the gravitational pull.

SHARED STRUCTURAL EXCLUSION

The Myth of the 'Cushion'

THE MICRO VIEW

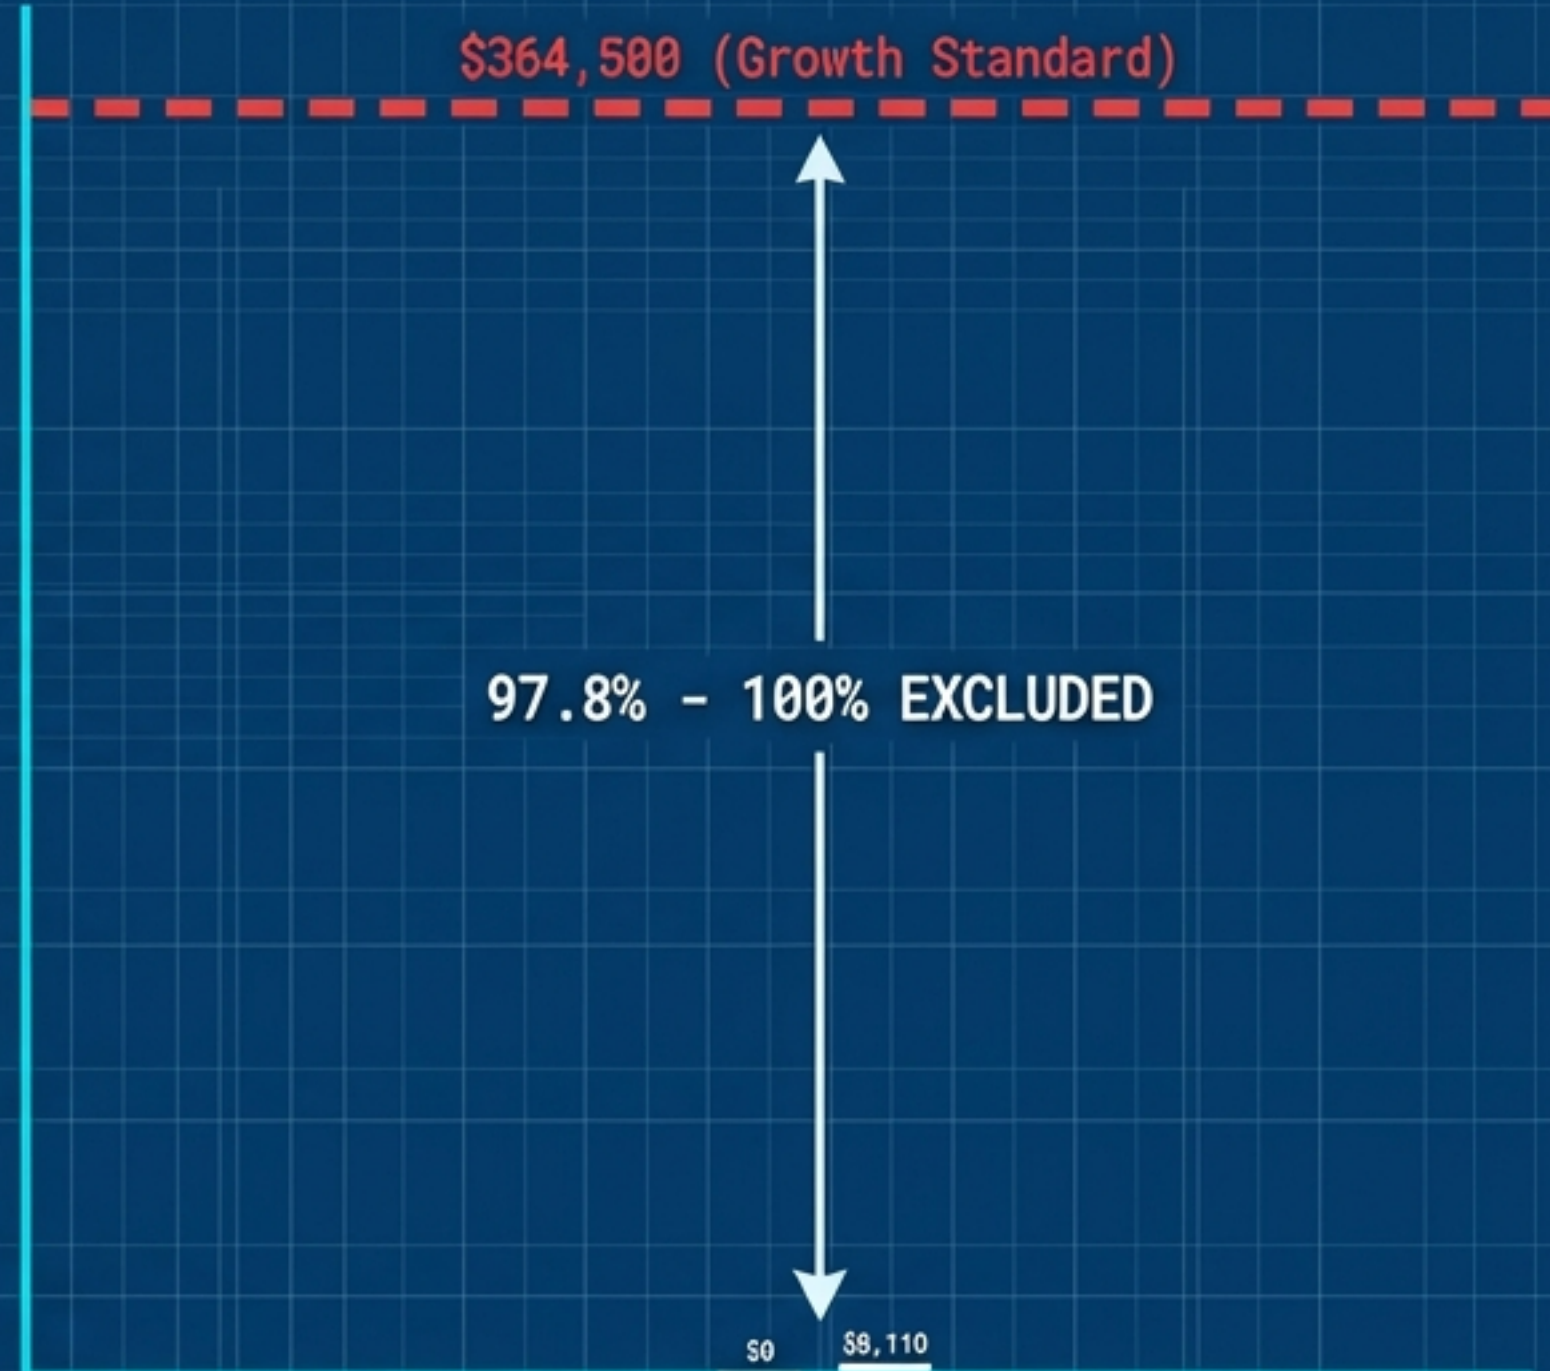

The \$8,110 "advantage" held by poor White families is an illusion. It is not capital; it is depreciating used cars (~\$5k) and barely \$500 in cash.

Defining Materiality against the Middle-Class Standard (\$364,500):

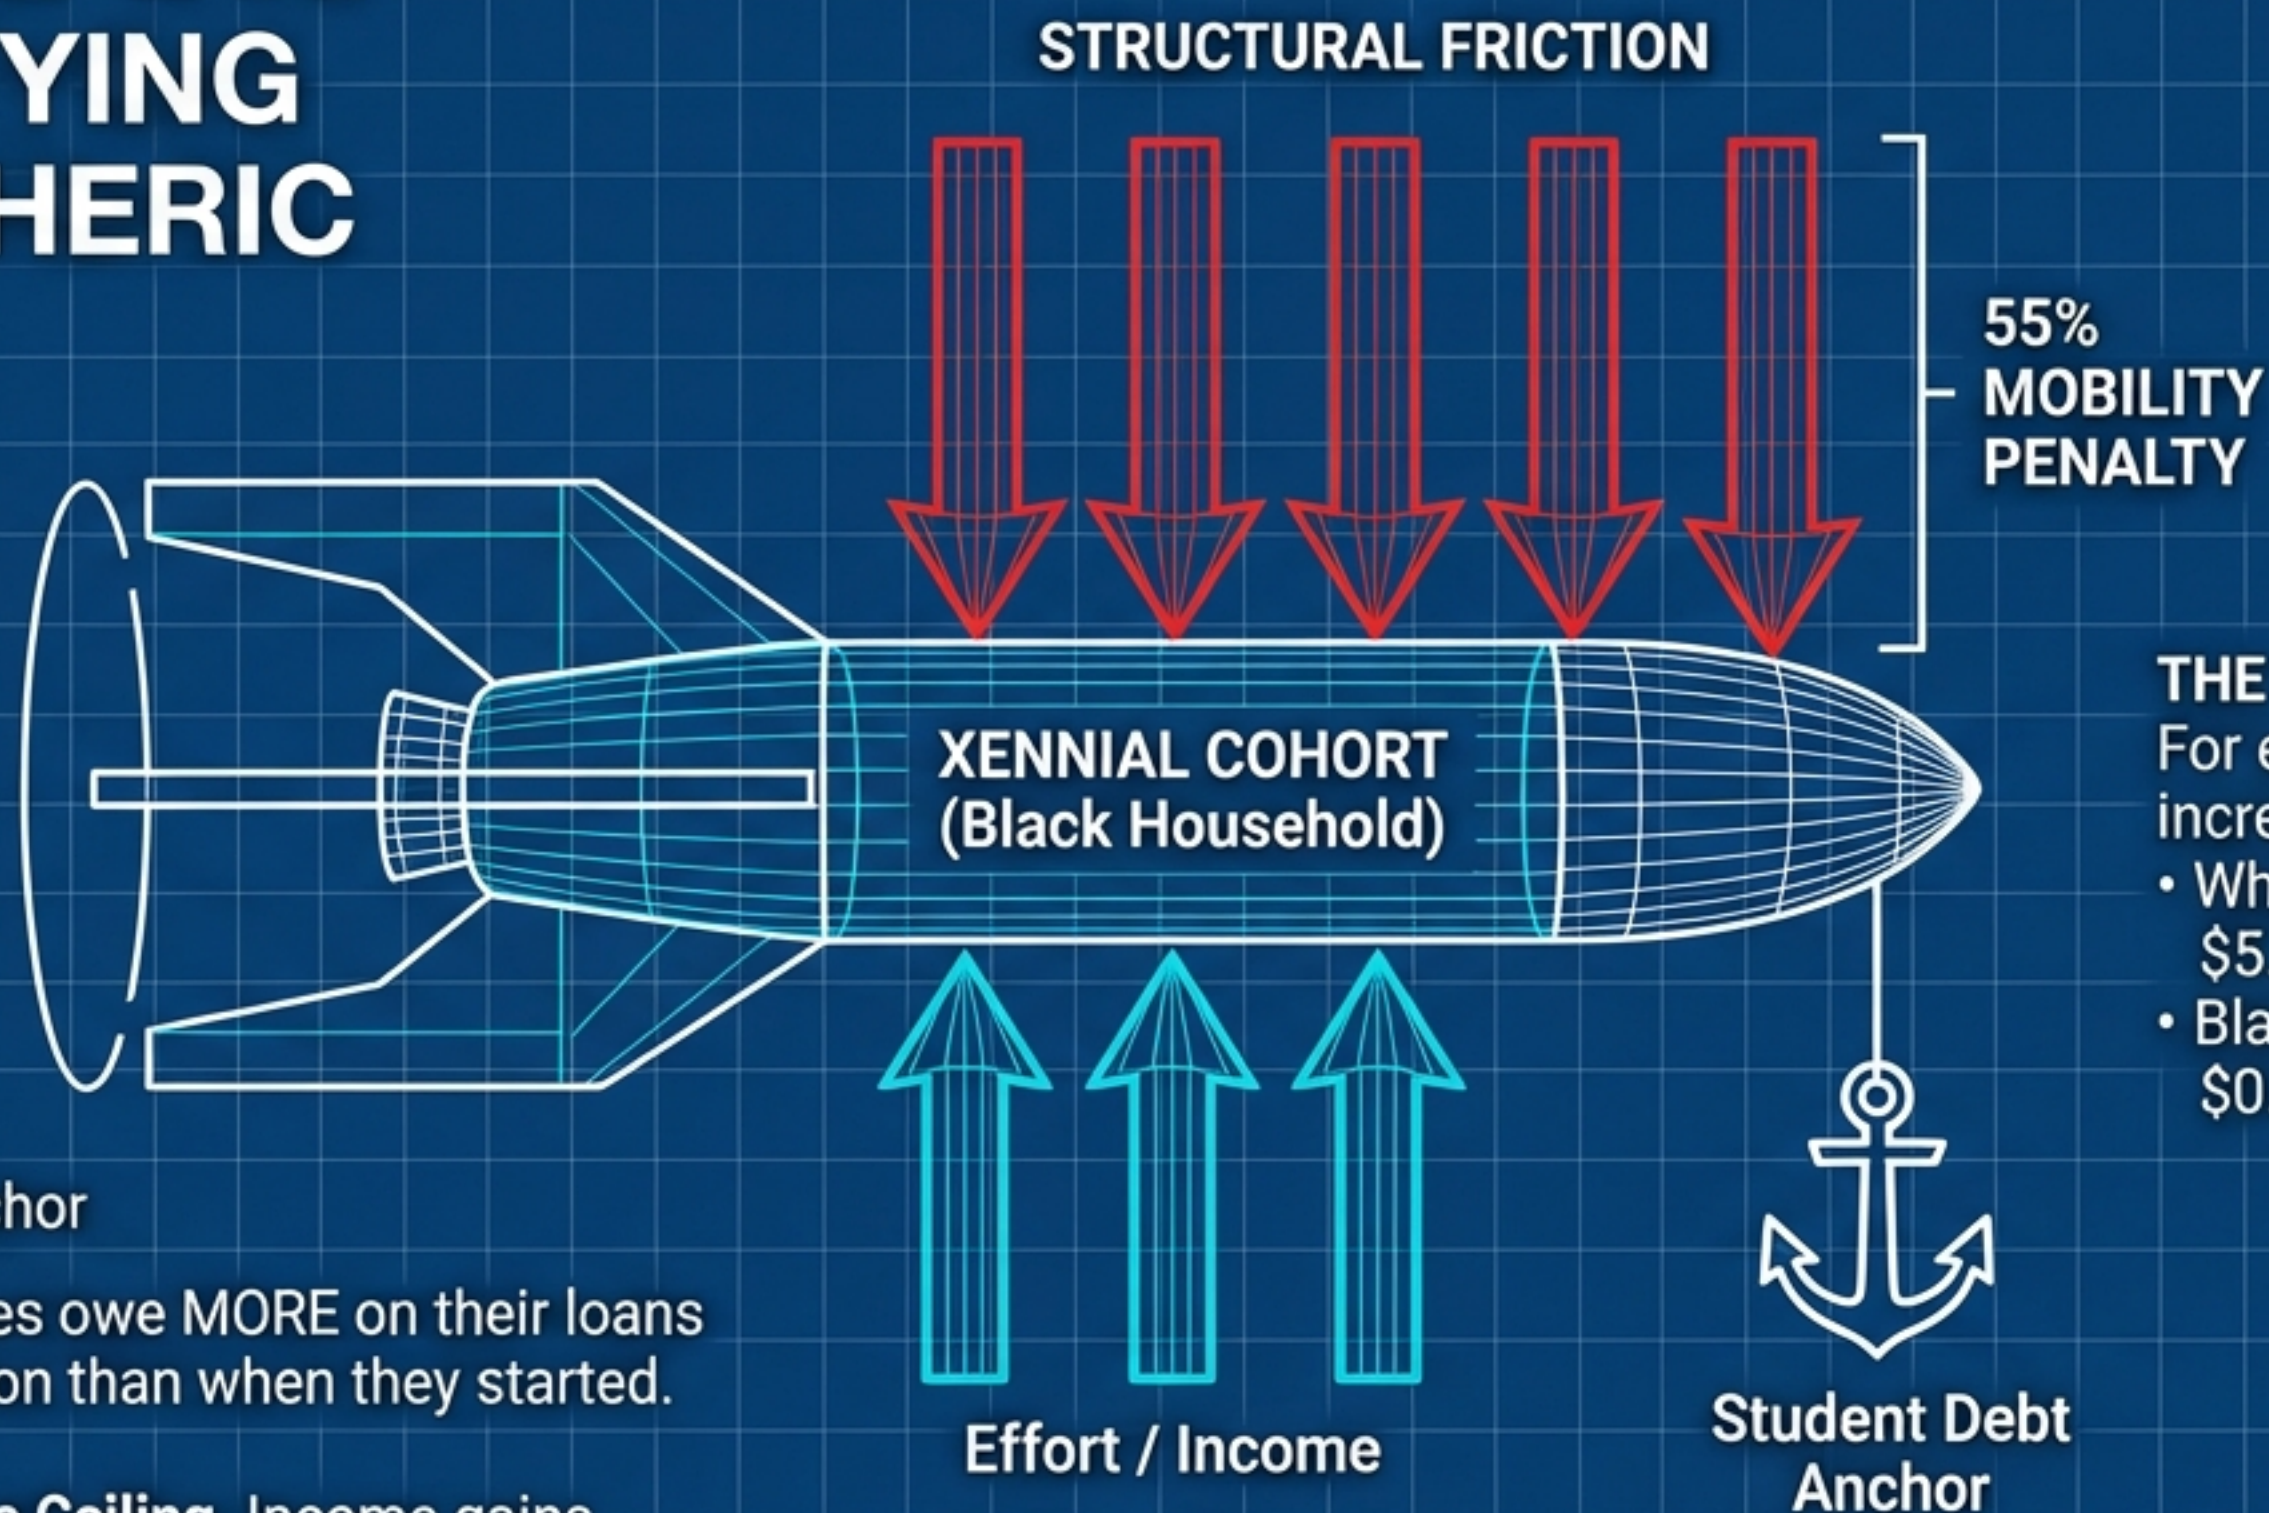

- White Bottom 20%: 97.8% Excluded.
- Black Bottom 20%: 100% Excluded.

THE MACRO VIEW

CONCLUSION: Whether you have \$0 or \$8,110, you are functionally grounded. The "White Advantage" at the bottom is a safety cushion, not rocket fuel.

THE RACE TAX: QUANTIFYING ATMOSPHERIC DRAG

THE MECHANISM:

The Student Debt Anchor

48% of Black graduates owe MORE on their loans 4 years after graduation than when they started.

RESULT: The Concrete Ceiling. Income gains fail to convert into wealth accumulation.

THE EFFICIENCY GAP:

For every \$1 income increase:

- White Families generate: \$5.19 in wealth.
- Black Families generate: \$0.69 in wealth.

THE RETROFIT: INTEGRATED CAPABILITY SYSTEM

A Life-Cycle Launch Pad

BIRTH:
Universal CDAs
(The Reservoir)

Solves the 'Time Deficit'.
18 years of compound
interest starting Day 1.

AGE 18:
Free College
(The Debt Shield)

Protects Return on
Degree (ROD). Removes
the Student Debt Anchor.

AGE 25:
Baby Bonds
(The Injection)

The Optimal Intervention
Window. Capital
injection when wealth
gap is smallest (\$15k).

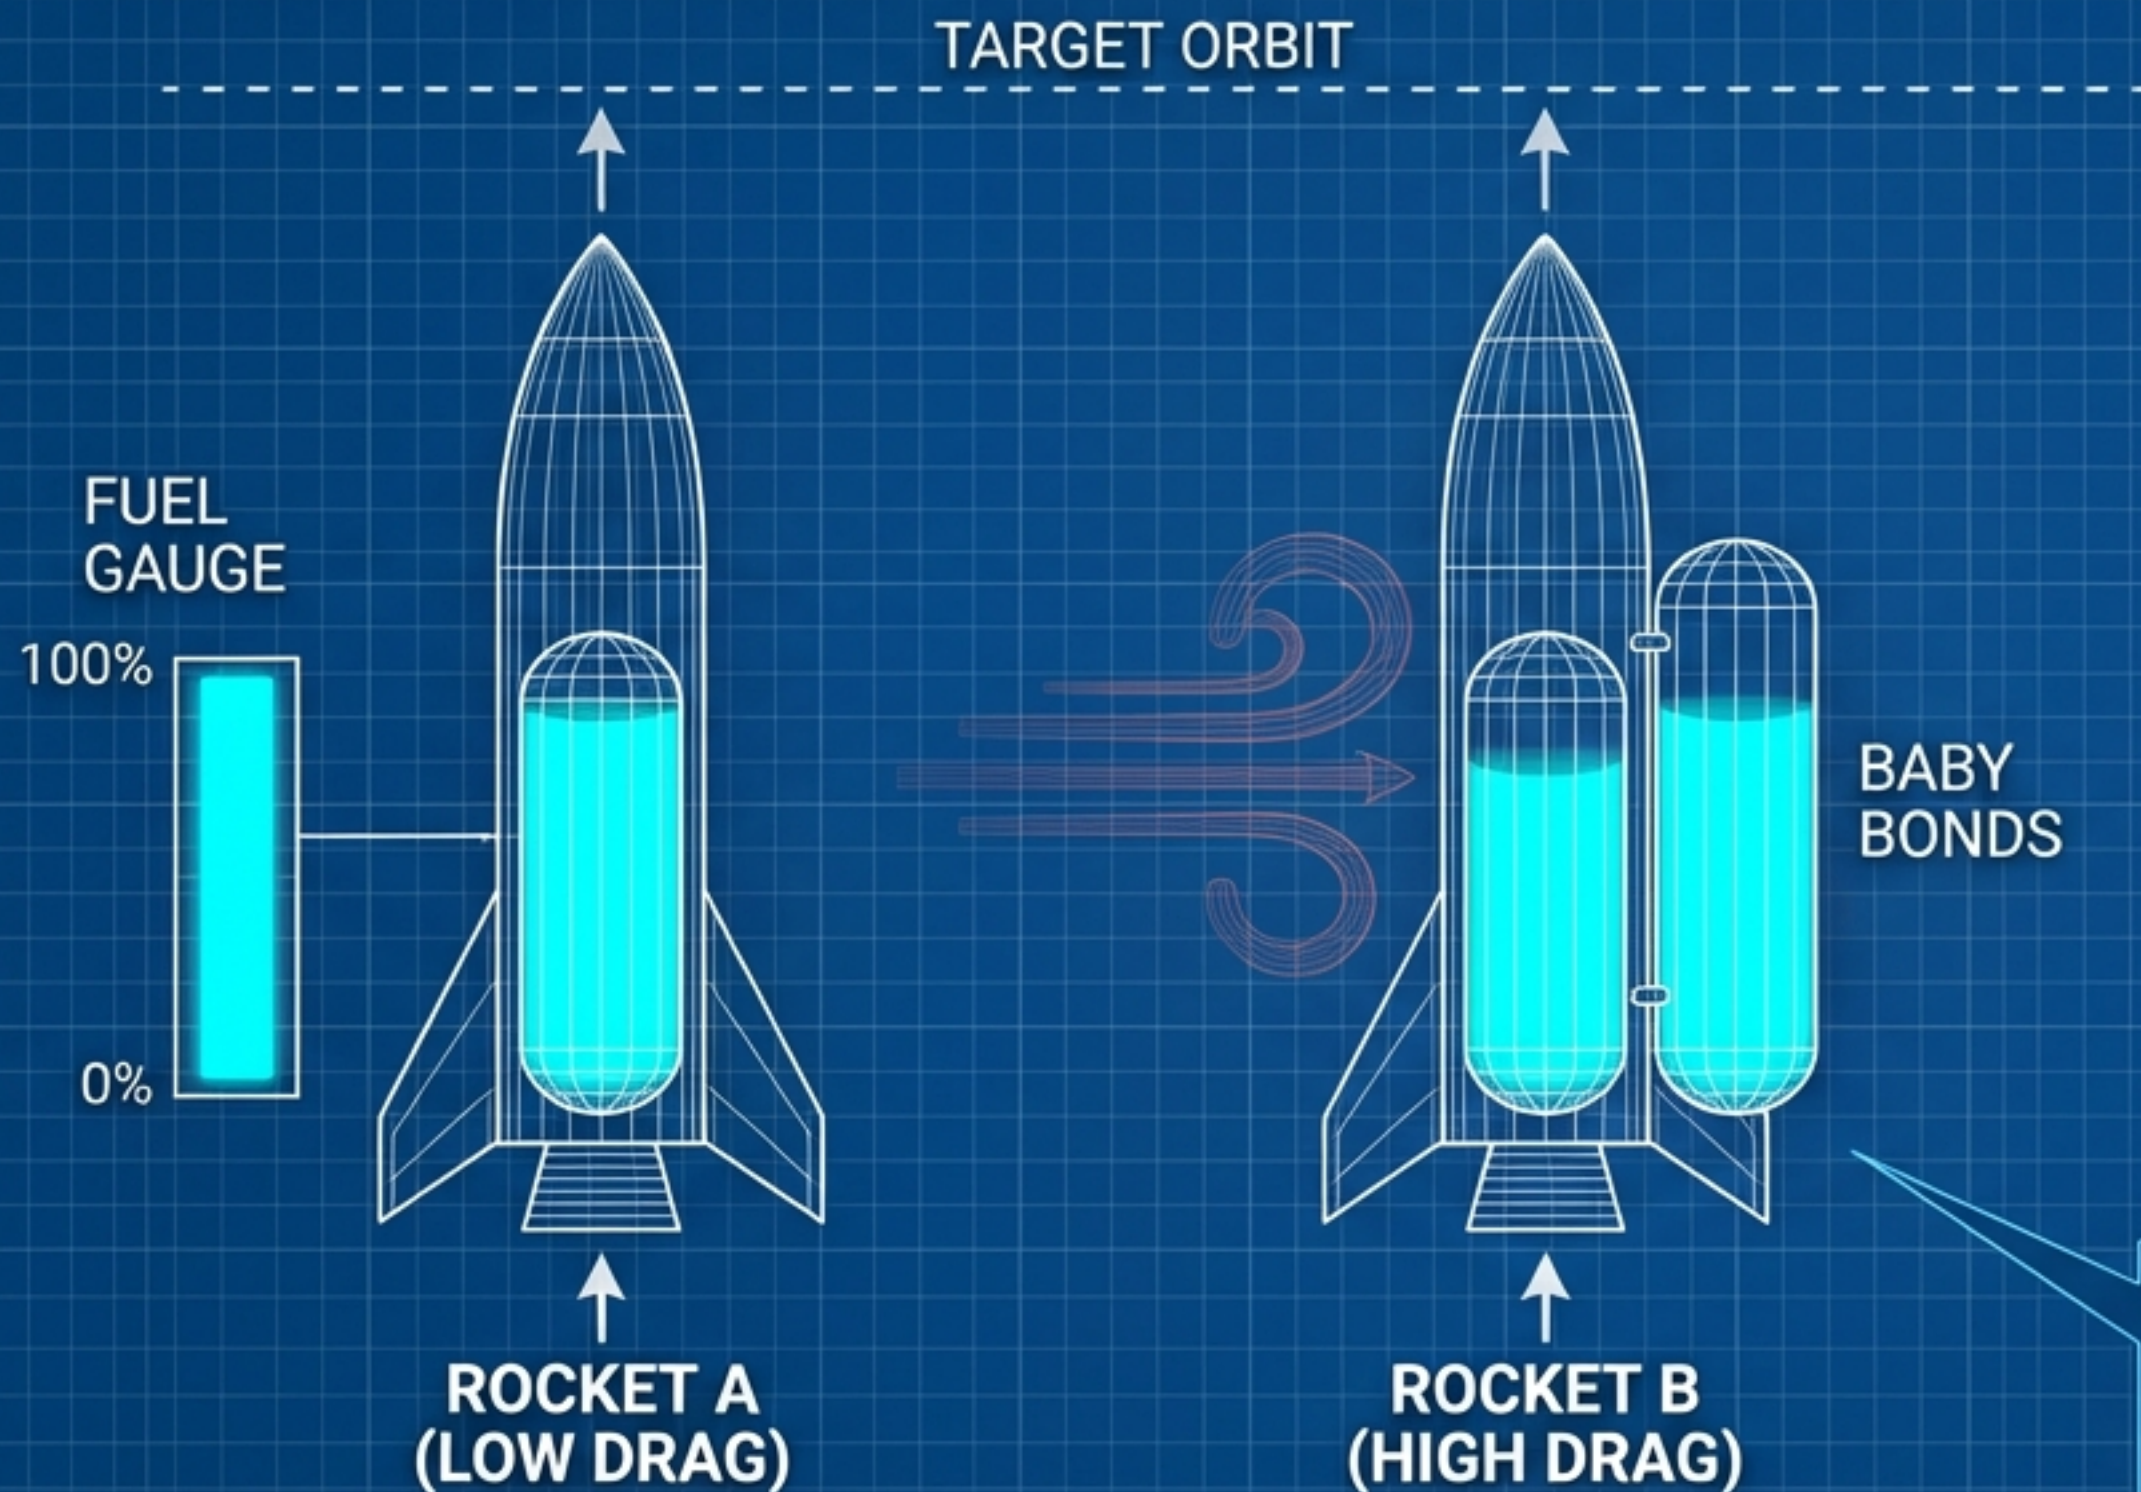

ADULTHOOD:
Guaranteed Income
(The Floor)

Structural Fuel.
Ensures volatility doesn't
force families to eat
their seed corn.

METHODOLOGY: CUSTOMIZED UNIVERSALISM

Fueling for the Atmosphere

THE PRINCIPLE: Net-Growth > Net-Zero

Equality means everyone gets a rocket.
Equity means calculating the fuel load based on atmospheric conditions.

WHY NET-ZERO FAILS:

Giving equal resources to unequal starting positions maintains the gap.

THE NET-GROWTH STRATEGY:

Combine Free College (Drag Reduction) with Baby Bonds (Thrust Addition) to neutralize the Race Tax.

GOAL: A Structural Meritocracy. We don't guarantee the outcome; we guarantee the CAPABILITY to fly.

THE FINAL CHARGE: SIGN THE MOU

From Safety Nets to Launch Pads

- **WE DEMAND A TRANSITION FROM A CONSUMPTION STATE TO A CAPABILITY STATE.**
- 1. RECOGNIZE the Physics of Wealth failure ($\$Ds > Wf$).
- 2. REJECT the false choice between Race and Class solidarity.
- 3. BUILD the Integrated Capability System.

**AUTHORIZED FOR
CONSTRUCTION**

STOP WAITING FOR THE LADDER. BUILD THE ROCKET.
